

# Bainbridge

# SPINNAKER CRUISE

Engineered from high-tenacity Nylon 66, Bainbridge Spinnaker Cruise is designed to meet the rigorous demands of the cruising sailor. This advanced fabric offers exceptional strength and durability, ensuring sails can withstand the harshest marine environments while maintaining peak performance. Offering a durable finish at a cost-effective price, it's ideal for both crosscut and radial applications.

The balanced construction of this fabric not only enhances its durability but also provides the ideal combination of flexibility and control, ensuring optimal handling in a variety of wind conditions.

Perfectly suited for both crosscut and radial sail designs, Bainbridge Spinnaker Cruise is available in two different weights—48gsm for lightweight performance and 68gsm for added strength. These options allow selection of the ideal fabric for specific needs, ensuring reliable performance without compromise.

#### Key benefits of Spinnaker Cruise:

- ◆ High tenacity Nylon 66
- ◆ Cruising applications
- ◆ Durable finish and cost effective
- ◆ Balanced construction.
- ◆ For crosscut and radial applications
- ◆ 48gsm and 68gsm
- ◆ Red, white and blue
