

# Bainbridge

# V-MAX

For decades, Bainbridge has been at the forefront of the spinnaker fabric industry with AIRX, a top choice for racing spinnakers worldwide. Building on this legacy, we're proud to introduce V-MAX - a new line of spinnaker cloth that covers the full spectrum of spinnaker applications. V-MAX has been developed to provide sailors with a high-quality, durable fabric specifically designed for use in sails that do not demand the firmer finish of our AIRX range.

### ◆ Exceptional Stability and Durability

V-MAX delivers a stable and long-lasting cloth suitable for various sailing environments. Its advanced polyurethane coating resists water absorption, ensuring that the spinnaker remains light and retains its shape, no matter the conditions. The coating provides ultra-low material porosity ensuring that no power is lost in crucial situations.

### ◆ Enhanced Tear Strength for Reliability

Constructed with high-tenacity yarns, V-MAX is engineered for exceptional tear strength, enhancing durability and making for a reliable choice even in challenging conditions. Sailors can trust V-MAX to handle stress and wear while maintaining optimal performance over time.

### ◆ Available Colours and Specifications

V-MAX currently comes in Red, White, and Blue, with a full range of colours planned for future release. The fabric width is 150cm, designed to meet a wide variety of spinnaker designs.

Style	Weight gsm	Width cm	Construction Warp x Fill	Availability Autumn 2024
V-MAX 50	32	150	30 x 20	Coming 2025
V-MAX 60	37	150	30 x 30	Coming 2025
V-MAX 70	45	150	30 x 30	Red, White, Blue
