INFINITY PROCESS

Solacryl Acrylic Canvas is treated with a special technological **Infinity Process** to ensure the lasting quality of the fabric. In this process, nanoparticles completely cover the surface of the fibres in the fabric, forming a permanent coat. After treatment, both the surface and the inside of the fabric are permanently protected against dirt build-up, and adverse effects of a wide variety of atmospheric agents. The low reactivity and high stability of the treatment endows long-term protection to the awning, especially against mildew and provides excellent water and oil repellence whilst allowing for superior cover shapes.

CARE & CLEANING

Proper care and cleaning should be taken to ensure the life of Solacryl Acrylic Canvas.

For regular care and maintenance, the excess dirt should be brushed from the fabric using a soft brush; the fabric should then be sprayed with warm water (not exceeding 40°C) and air-dried.

Periodically, the fabric should undergo a more thorough cleaning. Again, brush fabric with a soft bristled brush, spray with warm water, then apply a gentle soap. Let stand for 10 to 20 minutes taking care not to let it dry, then rinse thoroughly and air-dry. Do not use detergents and / or solvents.
