CARE & CLEANING

Proper care and cleaning should be taken to ensure the life of **SolaTX** fabrics.

For regular care and maintenance, the excess dirt should be brushed from the fabric using a soft brush: the fabric should then be sprayed with warm water and air dried.

Periodically, the fabric should undergo a more thorough cleaning. Again, brush the fabric with a soft bristled brush, spray with warm water, then apply a gentle soap. Allow to stand for 10-20 minutes taking care not to let it dry, then rinse thoroughly and air dry.

Do not use detergents and /or solvents.

WARRANTY

SolaTX fabrics are manufactured with only the highest quality raw materials and the most rigorous quality-assurance procedures in Europe.

We offer a 5 year limited warranty on our **SolaTX** solution dyed polyester products.

The technical data is to be considered as indicative. Minor colour variations possible between batches. Ensure only one batch is used per order. Can be sewn or ultra-sonically welded.
