 KoolFabTM

MORBERN
EUROPE

COATED FABRICS BY DESIGN

Using built-in technology, the pigments of Sundance KoolFab™ do not absorb all of the sun's rays but instead reflect non-visible IR (Infrared) waves, thereby reducing seating upholstery heat even on dark colours, including black.

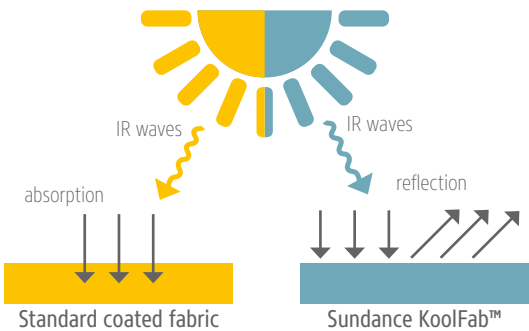

With a difference in fabric surface temperature of up to 28% in direct sunlight, Sundance KoolFab™ makes for a more comfortable sitting experience on the water and in any outdoor setting.

Available in 10 stay-cool colours featuring Morbern's best-selling Sundance textile grain

KoolFab™ technology can be applied to any custom coated fabrics production.*

For more information, contact: europa.sales@morbern.com

*MOQ applies

										
Sundance Colour ***	Java	Cedar	Legion Blue	Aubergine	Jet (Black)	Scandi Blue	Hemlock	Slate	Warm Grey	Buckskin
Standard temperature *	65	69	57	67	69	69	59	67	62	56
With KoolFab™ *	54	52	48	48	53	52	52	51	51	47
% heat reduction **	17%	24%	15%	28%	22%	24%	12%	24%	18%	16%

* temperatures in Celsius (to the nearest 0.5°C) recorded under sunlight exposure conditions in which a white (most reflective colour) reached 35°C

** controlled lab samples have shown heat reduction % to be sustained over 6 hours
